

RAHUL NAIR

Bengaluru, Karnataka | +91 98XXXXXX21 | rahul.nair.dev@example.com | linkedin.com/in/rahulnair

PROFESSIONAL SUMMARY

Python Developer with 4+ years of experience building production backend applications and REST APIs using Python and Django. Strong experience with Django REST Framework, PostgreSQL, Redis, Docker and CI/CD. Experienced in performance optimization, automated testing and collaborating with frontend and QA teams.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript

Frameworks & APIs: Django, Django REST Framework, FastAPI, REST APIs

Databases & Cloud: PostgreSQL, Redis, AWS, Docker, Linux

Tools: Git, GitHub, GitLab CI/CD, PyTest, Postman, Jira

PROFESSIONAL EXPERIENCE

Senior Python Developer — BluePeak Technologies Pvt. Ltd. | Jun 2023 – Present

- Developed and maintained Django-based backend services supporting customer and order workflows for a SaaS platform.
- Designed REST APIs with Django REST Framework and implemented authentication, validation, pagination and error handling.
- Optimized PostgreSQL queries and application code, reducing average API response time by approximately 32%.
- Implemented Redis caching and background processing for high-volume operations.
- Built Docker-based development and deployment workflows and maintained GitLab CI/CD pipelines.
- Added PyTest unit and integration tests, increasing backend test coverage from 58% to 84%.

Python Developer — FinServe Digital Solutions | Jul 2021 – May 2023

- Built reusable Python modules and Django applications for financial reporting and internal operations.
- Developed REST endpoints using Django REST Framework and integrated PostgreSQL and third-party services.
- Worked with Linux servers, Git workflows, Postman and production troubleshooting.
- Participated in Agile ceremonies, code reviews and release planning with frontend and QA engineers.

PROJECTS

Customer Operations API Platform

Built a Django REST service for customer onboarding, document validation and workflow management. Implemented role-based access, PostgreSQL persistence, Redis caching and automated tests.

Technologies: Python, Django, DRF, PostgreSQL, Redis, Docker, PyTest

Inventory & Order Management

Developed backend APIs for inventory, order processing and reporting with scheduled jobs and performance monitoring.

Technologies: Python, Django, PostgreSQL, Celery, Docker

EDUCATION

B.Tech in Computer Science and Engineering — Visvesvaraya Technological University | 2017 – 2021

CERTIFICATIONS

- Django REST Framework API Development – 2024
- AWS Certified Cloud Practitioner – 2023
