Arjun Menon

Python Backend Developer

Kozhikode, Kerala | +91 90000 12345 | arjun.menon.synthetic@example.com
github.com/arjun-menon-dev | linkedin.com/in/arjun-menon-dev

CAREER HIGHLIGHTS

- Built backend APIs using Python and FastAPI for candidate and job-management workflows.
- Created Django modules with server-side form validation and database persistence.
- Designed relational schemas for PostgreSQL and SQLite-backed applications.
- Implemented REST endpoints with Pydantic request and response models.
- Used pytest for unit tests, validation tests and API-level test cases.
- Worked with Git and GitHub for source control, branches and pull requests.
- Used Postman to manually validate API contracts and error responses.
- Documented local development steps and API request examples for teammates.
- Practiced clean separation between routers, services, models and persistence code.
- Investigated failures involving validation errors, missing records and database constraints.
- Used SQL joins, filtering, aggregation and parameterized queries in application code.
- Explored Docker-based development environments for repeatable local setup.

EXPERIENCE

Python Backend Developer Intern

CodeNest Technologies · Kochi, Kerala · Jan 2024 – Jun 2024

- Developed FastAPI endpoints for candidate, job-description and application workflows.
- Designed PostgreSQL tables and SQL queries for candidate profiles and scoring results.
- Built Pydantic request and response schemas with validation for REST API payloads.
- Wrote pytest cases for authentication, validation, CRUD operations and error handling.
- Used Git and pull requests for source control, code review and release preparation.

Software Engineering Trainee

BluePeak Digital Labs · Calicut, Kerala · Jul 2023 – Dec 2023

- Implemented Django modules for student registration and administrative dashboards.
- Created reusable service functions for database operations and input validation.
- Tested APIs with Postman and documented common request and response examples.
- Investigated defects involving form validation, database constraints and JSON responses.

PROJECTS

- Recruitment ATS API — FastAPI, PostgreSQL, Pydantic, pytest.
- Implemented resume upload, structured profile extraction and scoring workflow.
- Inventory Management REST API — Django REST Framework, PostgreSQL, Docker.
- Added product, supplier and stock-movement CRUD endpoints with validation.
- Student Registration Portal — Django, SQLite, HTML and CSS.
- Added registration forms, server-side validation and persistent student records.

EDUCATION & CERTIFICATIONS

- B.Tech in Computer Science and Engineering — Kerala Institute of Technology — 2020 – 2024
- Higher Secondary – Computer Science — Government Higher Secondary School — 2018 – 2020
- Python Programming Fundamentals – SkillForge Academy, 2024
- REST API Development with FastAPI – DevPath Learning, 2024
- SQL and PostgreSQL Essentials – OpenLearn Labs, 2023

ADDITIONAL CONTRIBUTIONS

- Built and demonstrated a working FastAPI project during a final-year engineering project review.
- Presented a database-backed REST API prototype at a college technical event.
- Maintained project documentation with setup steps, API examples and test instructions.
- Comfortable reading API logs and tracing validation failures.
- Familiar with JSON, HTTP methods, status codes and REST conventions.
- Familiar with relational database normalization and foreign keys.
- Comfortable writing concise technical documentation.
- Comfortable collaborating through code review and pull requests.
